## Do You Want to Be A **Thermostat** or a **Thermometer**?

- Sandi Slough

### **Myth or Reality?**

**They'll Come to Us.**

**They'll Use What We Pick Out.**

**They'll Ask Us To Teach With Them.**

**We'll make an impact on every kid.**

## Running The Numbers

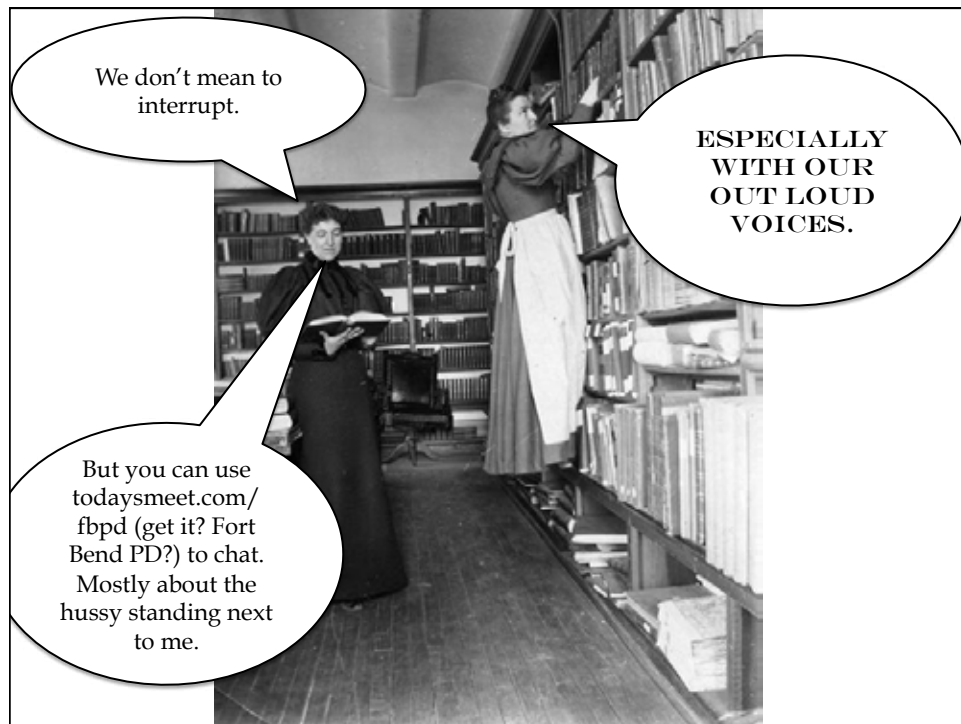

- Librarian to Student Ratio = 1:2400 (or 27 minutes per student)
- Number of school hours mandated each year (Michigan) = 1080
- Planning with each of 100 teachers at 1 hour each = 100 hours
- 3 Hours/Week for Library Administration = 120 hours
- Number of hours available to work with children = 860
- Number of minutes available per student per year = 21.5

**What can you teach in 20 minutes a year?**

## Alternatively:

- Library Administration at 3 hours/week = 120 hours
- Demos at 40 staff meetings at 30 min each = 20 hours
- 5 hours of one-on-one PD for each of 100 teachers = 500 hours
- 40 after-school professional book clubs at 2 hours each = 80 hours
- 10 webinars at 1 hour each = 10 hours
- 40 PLC meetings at 1 hour each = 40 hours

**And you still have 310 hours left over ... that's almost 8 work weeks**

**They May Stay In Their Rooms with iPads/laptops.**

**They May Not Use What We Pick Out and Use Google Instead.**

**They May Not Ask Us To Teach With Them.**

**But eventually, they'll bring more and better info lit/tech into their lessons if we do PD. Librarians can potentially reach *more* kids this way ...**

## Turn and Talk

- What do you know how to do that your classroom colleagues do not yet know but that would enhance their ability to improve student learning in the digital age?
- Share with one another
- Post to [todaysmeet.com/fbpd](http://todaysmeet.com/fbpd)

There are many ways  
to be a leader. But  
**BEING A LEADER**  
is not negotiable.

Judy Lawson, UM School of Information

**How do you eat an elephant?**

**Needs First.  
Then Planning.  
Then Doing.  
Then Reflecting.**

## ADDIE (Veldof 2006)

FIGURE 1-1 Instructional Design Cycle

Creating the One-Shot Library Workshop: A Step-By-Step Guide  
[books.google.com](https://books.google.com/books?id=02-8p...)  
 Carolyn R. Veldof 2008 - 172 pages - Google eBook - Preview  
 Provides information on creating and running a one-session library workshop.

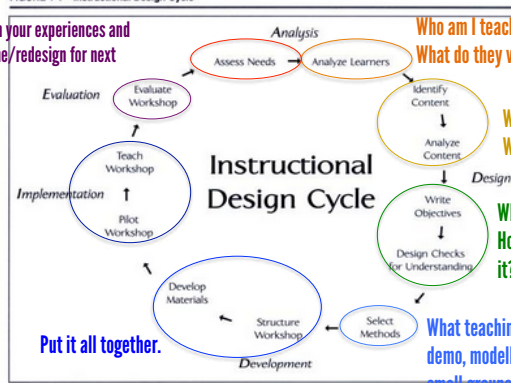

## ADDIE (Veldof 2006)

Not, "What can the library do for you?" but,  
 "What are the needs of my building?"

Collect feedback. Reflect on your experiences and observations. Rethink/refine/redesign for next time.

Do the workshop.

Your **goal**, whether you are

presenting at a conference,

leading a before-school demonstration,

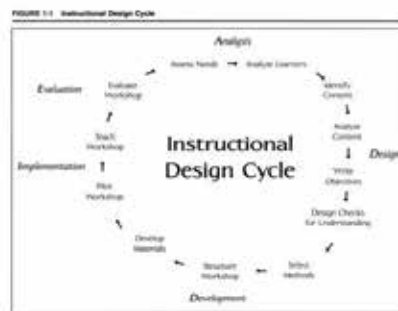

working one-on-one with a teacher over lunch or planning time, or

hosting an after-school professional book club

*Is to build others' capacity.  
Not to show how awesome you are.  
Though that's a nice side benefit.*

## Turn and Talk: Scenario #1 (Analysis)

- Your department has been asked to lead a session for teachers on how to build a classroom collection.
- You know the **superintendent's** need, but how would you go about knowing the **classroom teachers'** needs?
- How would you find out about your learners?
- Post to [todaysmeet.com/fbpd](http://todaysmeet.com/fbpd)

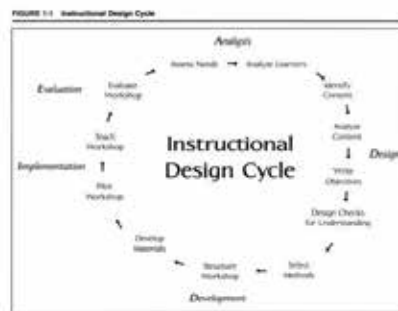

## Sharing

## Turn and Talk: Scenario #2 (Design)

- What was the most effective PD session you ever attended?
- What made it great?
- Discuss and post to [todaysmeet.com/fbpd](http://todaysmeet.com/fbpd)

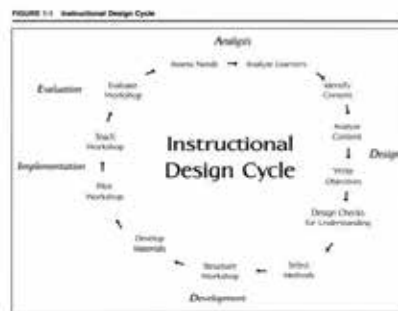

## Sharing

"Sharing is Nice" by daveparker on Flickr. CC-BY-2.0.  
<http://flickr.com/photos/daveparker/33902969>

## Turn and Talk: Scenario #3 (Evaluate)

- Your Director of Language Arts is super-excited about Lexiles, and you hear at the district picnic that teachers are **FREAKED OUT** about having enough range of materials. You know that Gale Cengage has Lexile levels assigned to its databases, and you host a workshop.
- How would you **evaluate** success?
- Post to [todaysmeet.com/fbpd](http://todaysmeet.com/fbpd)

## Sharing

## Kristin's Final Thoughts: Focusing on PD ...

- Is time- and energy-efficient
- Meets the just-in-time needs of teachers
- Builds building-wide capacity
- Recognizes that librarians have unique skills in resource selection and information/digital literacy
- Supports building-wide school improvement goals
- Repositions librarians as having value in the "nobody needs librarians anymore because ... it's all online ... we're 1:1 ... we have tech staff ... we have classroom collections ..."
